STRENGTH OF MATERIALS
Volume 9, Numbers 1-12, 1977
(A translation of Problemy Prochnosti)

A

Abramchuk, G. A. - 771
Afonin, N. I. - 1267
Agishev, B. M. - 363
Akhremenko, V. L. - 1390
Alekhin, V. A. - 771
Aleksandrova, L. I. - 1127
Alekseev, V. K. - 764
Aleksenko, E. N. - 555, 1320
Aleksyuk, M. M. - 120, 1499
Alfimov, P. T. - 175
Alifanov, Yu. P. - 1231
Alymov, V. T. - 638
Andreev, G. Ya. - 756
Andreikiv, A. E. - 531
Andropov, N. P. - 638
Anufriev, Yu. P. - 1477
Arkhipov, A. N. - 294
Arpent'ev, B. M. - 756
Astaf'ev, A. A. - 1248
Astanin, V. V. - 728, 999
Aubakirova, R. K. - 218

B

Babenko, A. E. - 247, 783
Babich, D. V. - 51
Babich, V. K. - 704
Badilenko, G. F. - 699
Bakhtibeav, A. N. - 72
Balalaev, V. A. - 485
Balandin, Yu. F. - 259
Ban'kovskii, O. I. - 868
Barabanov, V. N. - 89, 883, 1510
Barilo, V. G. - 125
Baryshev, G. A. - 1087
Bashta, V. V. - 1007
Bastun, V. N. - 1215
Baumshtein, M. V. - 12, 139, 547
Bazelyuk, G. Ya. - 1343
Bega, N. D. - 1471
Bekbulatov, R. S. - 616
Belen'kii, D. M. - 1494
Beletskii, V. M. - 142, 1020
Belinskii, V. S. - 1430
Belkin, M. Ya. - 359
Belubekyan, É. V. - 305
Belyaev, M. S. - 1316
Bera, N. D. - 681
Berezhkova, G. V. - 1206
Berezhnitskii, L. T. - 389, 1410
Betekhtin, V. I. - 72
Bezruchko, V. P. - 287
Bich, É. N. - 1075
Bichuya, A. L. - 351, 825
Bilan, V. N. - 626
Blinov, V. N. - 1211
Bobritskaya, S. D. - 1055, 1114
Bochkovskii, V. S. - 51
Bodryshev, V. V. - 764
Borimskii, A. I. - 1199
Borisov, Yu. S. - 1267
Borodachev, N. M. - 400
Borodko, T. V. - 340
Boromolova, L. N. - 1337
Bortovoi, V. V. - 777
Bragina, V. I. - 300
Bresler, M. S. - 1147
Bukatin, O. V. - 272
Bulygin, I. P. - 1337

STRENGTH OF MATERIALS
Volume 9, Numbers 1-12, 1977

(A translation of Problemy Prochnosti)

Volume 9, Number 1 January, 1977

	Engl./Russ.	
SCIENTIFIC AND TECHNICAL SECTION		
Determining Fracture Toughness from the Results of Fatigue Tests in Circular Bending – V. T. Troshchenko, V. V. Pokrovskii, and A. V. Prokopenko	1	3
Laws Governing the Development and Retardation of Fast Cracks Fracturing Layer-Like Metallic Substances – A. N. Podgornyi, I. S. Guz', and M. B. Mileshkin	7	9
Extrapolation of Heat-Resistance Characteristics of Metals by Temperature–Time Methods – V. I. Kovpak and M. V. Baumshtein	12	14
Study of the Creep of Molybdenum Single Crystals – E. É. Zasimchuk and V. V. Krivenyuk	16	17
Resistance of Structural Steels in Biaxial Stress State to Low-Endurance Fatigue Fracture – O. N. Vinkler, B. P. Polezhaev, V. V. Larionov, and V. M. Tarasov	20	21
Investigation of Turbine Blade Endurance during Thermal Cycling and Vibration in a Gas Stream – A. I. Petrenko	26	28
Calculating the Strength of Thin-Walled Cast Pipework Elbows Loaded by Internal Pressure – B. N. Dudko	31	34
Effect of the Electron State of a Metal on Its Mechanical Properties and the Phenomenon of Electroplasticity – O. A. Troitskii	35	38
Construction of a Numerical Solution for Thermorheological Problems – S. É. Umanskii	45	47
Stability of Uniformly Rigid Glass-Fiber-Reinforced Shells of Rotation – V. S. Bochkovskii, D. V. Babich, O. A. Goroshko, I. K. Koshevoi, A. F. Romanchenko, and S. V. Urbanskii	51	52
Analysis of the Stress Distribution Around Notches in Structural Elements beyond the Fatigue Limit – A. G. Makarenkov and I. S. Chernyshenko	56	56
Characteristics of Tangential-Stress Distribution during the Twisting of Thin-Wall Open Fiberglass Shapes with a Variable Winding Angle – L. S. Makhov and V. S. Strelyaev	61	61
Stress Concentration near Stepped Holes in Plates of Medium Thickness – A. I. Zirka, V. I. Lavrenyuk, and V. I. Savchenko	66	66
Experimental and Theoretical Investigation of Heat Evolution in a Short Viscoelastic Cylinder in Cyclic Compression – B. M. Gorelik, L. P. Goncharov, V. G. Karnaukhov, I. K. Senchenkov, and G. A. Yakovlev	68	68
Features of the Failure of Crystalline Materials in the Translation to the Brittle Condition – V. I. Betekhtin, A. Zaripov, A. N. Bakhtibeav, and S. A. Ivanov	72	71
The Problem of the Classification of Low-Deformation Materials Based on the Features of Their Behavior under Load – G. A. Gogotsi	77	77
Distribution of Fracture Stresses in Ceramic Samples at Various Loading Rates – I. P. Nikolaeva and S. G. Nikol'skii	84	83
Physiocomechanical Properties of Silicized Graphites – V. N. Barabanov and A. S. Tarabanov	89	88

	Engl.	Russ.
Relationships between Strength Characteristics in Irradiated Graphite — Yu. S. Virgil'ev, V. G. Makarchenko, and Yu. S. Churilov	95	95
Effect of Heat Treatment on the Strength and Toughness of Steel 30KhGSA V. G. Laz'ko, N. I. Karchevskaya, and B. M. Ovsyannikov	102	101
Development of Slip in a Polycrystalline Material and in Cracked Rocks — G. P. Cherepanov and R. S. Kocharov	107	107
Effect of an Alternating Electric Field on the Plasticity of NaCl Single Crystals — O. K. Tsarev, A. N. Narozhnyi, L. B. Zuev, and S. A. Datsuk	111	111
PRODUCTION SECTION		
Improving the Accuracy of Acoustic Stress Determination — O. I. Gushcha, A. N. Guz', F. G. Makhort, and V. K. Lebedev	114	114
Effect of Test Machine Rigidity upon Low-Cycle Crack Kinetics — V. I. Erofeev and V. Ya. Yablonko	117	117
Installation for Studying Mechanical Properties of Nonmetallic Materials in the +600 to −190°C Range — M. M. Aleksyuk, M. N. Ovdei, A. I. Petrenko, V. A. Lokshin, and M. D. Dubina	120	121

Volume 9, Number 2 February, 1977

	Engl.	Russ.
SCIENTIFIC-TECHNICAL SECTION		
Thermodynamic Approach to Evaluation of the Longevity of Tapered Specimens Operating under Thermal-Cycling Conditions — G. N. Tret'yachenko and V. G. Barilo	125	3
Probability Model of Fatigue Life in Light of Notions of Linear Fracture Mechanics — I. I. Khazanov and V. A. Politov	132	10
Calculation of Fatigue-Crack Growth Rate in Metals — V. T. Troshchenko, A. V. Prokopenko, V. V. Pokrovskii, and M. V. Baumshtein	139	16
Sensitivity of High-Strength Aluminum Alloy V93 to Stress Concentration in Static and Repeated Loading — V. M. Beletskii, S. I. Kishkina, and Ya. A. Rublev	142	20
Influence of Machining Methods on the Residual-Stress Distribution and Fatigue Strength of Steel ShKh15 Specimens — F. P. Smaglenko, B. A. Gryaznov, and S. S. Gorodetskii	145	23
Plastic Deformation at Elevated Temperatures — K. N. Rusinko and R. V. Mulyar	150	29
Determining the Functional Relationship between Stress, Strain, and Temperature under Conditions of Uniaxial Loading Based on the Nonlinear Theory of Hereditary Media — Yu. N. Shevchenko and R. G. Terekhov	154	33
Creep of Copper in the Temperature Range $(0.35\text{–}0.64)T_m$ within the Framework of the Structural—Phenomenological Model — L. M. Nerodenko, R. O. Lents, and O. G. Kasatkin	158	37
Taking Temperature into Account in Hereditary Theory of Elastoplastic Media — Yu. V. Suvorova	163	43
Creep of Organic Glass under Shear with Superposition of Hydrostatic Pressure — O. E. Ol'khovik and N. P. Demenchuk	168	49
Effect of the Size Factor on the Strength of Materials in the Complex Stressed State — A. A. Lebedev, M. G. Loshak, V. M. Fridman, and P. T. Alfimov	175	56
Strength of Thick-Walled Vessels of Brittle Materials under External Pressure — L. K. Lushka	178	59
Investigation of the Failure Process on a Model of a Lamellar Composite — L. P. Frantsuzova	183	64
Structure Effects in the Stress—Strain Relations of Fluorinated Polymers at Elevated Temperatures — A. Ya. Gol'dman, M. A. Martynov, and P. A. Il'chenko	186	67
Torsional Stress State in a Hollow Shaft with Longitudinal Slots — V. I. Savchenko, T. Yu. Kepich, E. M. Grebelyuk, V. G. Dokuchaev, and L. Ya. Usherenko	189	71

Width and Area Determination for a Cyclic-Strain Hysteresis Loop — B. S. Shul'ginov and V. V. Matveev 192 74
Damping Capacity of VNS-2 Steel — E. S. Makhnev, V. M. Kondratov, V. A. Morozov, A. I. Skvortsov, and T. M. Gapeka 197 79
Effect of Initial Crack Length on the Resistance to Impact Bending Failure of Steels with Different Strengths — V. G. Martynov and M. A. Kramarov 201 83
Effects of Current Pulses on Crack Propagation Kinetics in Silicon Iron — Yu. I. Golovin, V. M. Finkel', and A. A. Sletkov 204 86
Relationship between the Strength and Sensitivity to Stress Concentrations of Martensitic Cr—Co—Ni—Mo Steel — N. A. Sorokina, E. A. Ul'yanin, A. P. Shlyamnev, and B. M. Ovsyannikov 210 92
Variation of Ductile—Brittle Transition Temperature with Grain Size — N. L. Kareta and V. G. Mazur 214 96
Electron-Microscopic Study of the Failure of the Superplastic Aluminum—Zinc Eutectoid — R. K. Aubakirova, V. A. Likhachev, Yu. I. Poliektov, A. A. Presnyakov, and V. V. Rybin 218 100
Temperature Field in a Specimen with Bilateral Electronic Heating — A. A. Uglov, V. N. Geminov, and A. A. Kaplan 220 103
Tensor Dislocation Density Near the Vertex of a Crack in an Elastoplastic Body — Sh. Kh. Khannanov 223 106

PRODUCTION SECTION
Studying Fatigue and Inelasticity in Metals in Symmetrical Bending, in the Range of Loading Frequencies 36-330 Hz and Above — N. I. Zhabko 226 108
Laboratory Complex for Fatigue Tests with Variation of Low-Temperature Conditions — I. M. Rafalovich and A. D. Chudnovskii 228 110
Analog Device for Automatic Plotting of Stress Diagrams in Mechanical Testing — V. G. Grishko, V. V. Sheiko, V. A. Strativnov, V. K. Kharchenko, and M. S. Opanasenko 231 113

CHRONICLES
Second All-Union Conference on Radiation Effects upon Mechanical Properties of Structural Materials and Methods of Studying Them — B. D. Kosov 235 116
All-Union Scientific and Technical Symposium on Methods and Techniques in the Experimental Study of the Mechanical Properties of Plastics — Yu. V. Efremushkin 240 120
Soviet—American Seminar at the Institute of Strength Problems, Academy of Sciences of the Ukrainian SSR — V. T. Troshchenko and V. A. Strizhale 243 123

Volume 9, Number 3 March, 1977

SCIENTIFIC-TECHNICAL SECTION
Stress-Strain States in a Three-Layer Cylindrical Shell with Strap Reinforcement under Internal Pressure — G. S. Pisarenko and A. E. Babenko 247 3
Estimating the Strength of Turbine Rotor Blades Taking into Account Operational Damage — V. T. Kozyrev 250 6
Evaluating the Thermal Cycling Strengths of Structural Materials and Structural Elements of Nuclear Power Plants with Sodium Coolant — Yu. F. Balandin, A. F. Malygin, A. A. Lisenkov, and E. V. Sennikov 259 13
Development of Fatigue Failure of Low-Carbon Sheet Steel at Room and Low Temperatures — S. Ya. Yarema, A. Ya. Krasovskii, O. P. Ostash, and V. A. Stepanenko 266 21
Fractographic Characteristics of Ductile Fracture of Iron — V. S. Ivanova, E. G. Smirnov, and O. V. Bukatin 272 27
The Critical Thermal Load in the Problem of Thermoelastic Waves — V. É. Nagrelli 275 30

Defect Coordinates on the Surface of Spherical Parts by the Acoustic Emission Method – A. N. Podgornyi and I. S. Guz' 278 33
A Method of Fatigue Testing of Thin-Sheet Materials in Plane Bending at High Loading Frequencies – A. G. Trapezon 283 38
Effect of Friction in an Abrasive Medium on the Fatigue Strength of Steels 30KhGSNA and 12KhN3A after Boriding and Carburizing – V. P. Bezruchko and A. S. Korotya 287 42
Performance Evaluation from Plate Vibration Suppression – I. A. Karnovskii, M. Sh. Landa, and Yu. M. Pochtman 291 46
Residual-Stress Determination for Slightly Curved Rods – A. N. Arkhipov 294 49
Change in the Shape of the Cross Section during the Creep of Bent Tubes Loaded with an Internal Pressure – V. A. Nakhalov, V. I. Bragina, and N. I. Slobodchikova . 300 54
Transcritical Strength Optimization for an Anisotropic Plate – É. V. Belubekyan, V. Ts. Gnuni, and L. O. Kizokyan 305 59
A Theoretical and Experimental Study of Large Deflections in Annular Elastic Membranes – V. G. Dvoryaninov and N. R. Sibgatullin 309 63
Effect of the Dependence of Thermal Deformation on Heating Rate on the Stressed State of Heat-Reflecting Coatings – G. N. Tret'yachenko, L. I. Gracheva, Ya. M. Grigorenko, A. T. Vasilenko, and N. D. Pankratova 317 69
The Limiting Stressed State and Carrying Capacity of a Multilayered Composite Soft Interlayer – R. S. Zainullin 322 74
The Resistance to Deformation and Failure of Cylindrical Tubular Elements of Industrial Glass under the Action of External and Internal Pressure – G. M. Okhrimenko and Yu. M. Rodichev 326 77
Variation of the Strength Properties of Carbon Materials with the Total Porosity – Yu. S. Virgil'ev 332 83
Creep Measurements on Refractory Ceramics – A. Ya. Peras 335 86
Methods of Determining the Service Life of Rubberized Cloth Materials under Cyclic Loading – T. V. Borodko, M. V. Vakorina, and A. I. Erchenkov 340 90
Mechanical Strength of the Piezoelectric Ceramic RsTBS-3, Modified by Addition of Glass Powder – V. I. Rivkin, V. V. Kochetygov, V. S. Kholopov, and G. G. Pisarenko 342 93
Effect of Temperature on Breaking Strength on Spallation in Copper – S. A. Novikov, Yu. S. Sobolev, B. L. Glushak, V. A. Sinitsyn, and A. V. Chernov 345 96
Strength of a Cold-Worked Mo–Re Alloy – V. A. Likhachev, Yu. A. Nikonov, T. G. Petrova, and A. P. Ponomarev 348 99
Effect of Hydrogen on the Mechanical Properties of Steels with Diffusion Coatings – Yu. N. Nikiforchin, N. I. Dydyn, A. L. Bichuya, A. S. Osered'ko, and V. F. Shatinskii 351 102
Determining the Vibration Characteristics of Electronic Equipment Components –O. N. Kurenkova and Yu. V. Zharkov 355 105

PRODUCTION SECTION

Fatigue Strength of Carbon Steel and Alloy Steel Shafts – M. Ya. Belkin, V. A. Masol, N. M. Savvina, and V. I. Rulev 359 109
Using Surface Plastic Deformation to Increase the Fatigue Strength of Aircraft Gas-Turbine Compressor Disks – B. M. Agishev, A. A. Elantsev, and N. V. Moiseenkov 363 114
Fatigue Strength of Bellows and the Effects of Manufacturing Techniques on the Mechanical Properties of 08Kh18N10T Steel – I. V. Petrushin, V. M. Sidorov, N. G. Sinitsyn, O. I. Fedorov, and A. V. Tsvilev 366 117
A Hydrostatic Installation for Testing Materials – Yu. G. Vazhentsev and L. M. Sedokov 368 120
An Improved Hydraulic Loading System for Testing Materials under Irradiation – V. N. Kiselevskii, S. S. Tishchenko, V. K. Lukashev, M. A. Lebedev, V. P. Gol'tsev, and A. I. Rytvinskii 370 122

BOOK REVIEWS
I. V. Kudryavtsev (editor). Strength of Large Machine Components – Reviewed by V. T. Troshchenko 373 124
D. V. Lebedev. Constructional Strength of Cryogenic Steels – Reviewed by N. N. Novikov 374 124

Volume 9, Number 4 April, 1977

SCIENTIFIC–TECHNICAL SECTION
Deformation of Alloy AMg_6 in a Plane Stressed State at Low Temperatures – B. I. Koval'chuk and A. A. Lebedev 375 3
Estimating the Role of Plasticity during Low-Temperature Fracture of Low-Carbon Steel – A. Ya. Krasovskii and G. N. Nadezhdin 379 7
Plastic Deformation of an Anisotropic Body – K. N. Rusinko and Yu. A. Yablochko 384 12
Effect of the Anisotropy of the Material on the Intensity Coefficients of the Stresses near Defects of the Crack Type – L. T. Berezhnitskii, V. V. Panasyuk, and V. M. Sadivskii 389 16
Effect of Surface-Layer Dissolution Rate on Softening of Polycrystalline Structural Materials during Plastic Strain – V. K. Starkov and A. I. Landau 397 22
A Theoretical Model of the Process of Fatigue Crack Development – N. M. Borodachev, M. P. Zhdanovich, and N. I. Savchenko 400 26
Reverse Elastic Aftereffect in Heat-Resistant Alloys under Cyclic Loading Conditions – V. V. Osasyuk, L. B. Getsov, and Yu. A. Kuzema 403 29
Experimental Verification of the Deformation Criteria of Low-Cycle Failure in Welds – V. V. Larionov 409 35
Experimental Test of Similarity Equations for Fatigue Failure in Components with Stress-Concentration Regions. 1. Derivation and Coefficient Analysis for Fatigue-Failure Equations for Components with Stress-Concentration Regions – L. A. Sosnovskii 415 40
Experimental Test of Similarity Equations for Fatigue Failure in Components with Stress-Concentration Regions. 2. Test and Error Estimation for Fatigue-Failure Equations for Components with Stress-Concentration Regions – L. A. Sosnovskii 421 46
Estimation of the Carrying Capacity of a Metal Glass-Plastic Vessel in the Presence of a Damaged Reinforcing Layer – V. S. Strelyaev and L. L. Sachkovskaya 427 51
Stability of Two-Layer Spherical Envelope under Action of Uniformly Distributed External Pressure – P. G. Krzhechkovskii and V. G. Lavrenyuk 431 55
Contact Problem for a Circular Cylindrical Shell and an Open Circular Rod – A. L. Zaidenberg, E. V. Ivchenko, and E. M. Makeev 436 58
The Reliability of Structures under Conditions of Random Loading – Yu. I. Kozub and Ya. A. Krokhin 443 63
Determining the Optimum Safety Factors – Yu. I. Savvin and A. I. Fedyakin 448 67
Problems of Rating the Life of Aircraft Design Elements in Random Loading – E. S. Pereverzev 452 70
The Effect of Low Temperatures on the Rate and Microfractographic Features of the Development of a Fatigue Crack in Low-Carbon Steel – A. Ya. Krasovskii, O. P. Ostash, V. A. Stepanenko, and S. Ya. Yarema 458 74
Characteristics of the Breakdown of Rods by Longitudinal Stress Waves – V. M. Finkel', Yu. I. Golovin, V. M. Umrikhin, and A. A. Sletkov 463 79
Development of Microplastic Deformation in Composite Iron-Based Materials – S. A. Golovin and I. I. Renne 468 84
Influence of Temperature on the Anisotropy of the Yield Point of Predeformed Carbon Steel – A. A. Lebedev and I. V. Makovetskii 472 88

Engl./Russ.

Fractographic Peculiarities in Brittle–Ductile Transition in Polycrystalline Molybdenum – A. D. Vasil'ev, I. S. Malashenko, V. A. Pisarenko, L. M. Postnov, V. I. Trefilov, and S. A. Firstov 476 91
Aerodynamic Viscosity and the Aerodynamic Damping of Bending and Torsional Vibrations in Turbine Blades – V. A. Balalaev, A. A. Kaminer, and N. Ya. Nastenko 485 100
The Effects of Polarization Method on the Mechanical Strength of a Piezoceramic – N. S. Ibraimov, V. V. Kochetygov, P. E. Motin, G. G. Pisarenko, and V. S. Kholopov 490 105

PRODUCTION SECTION
Strength Measurements on Turbopump Blades – V. N. Gorodetskii, I. A. Kozlov, A. B. Yudin, and S. Z. Stasyuk 493 107
A Method of Designing Rupturing-Membrane Safety Valves – A. E. Selyutin, E. I. Selyutina, V. S. Golovenko, and A. A. Lebedev 496 111
Investigation of the Strength of Bolts – V. S. Gnuchev 499 113
The Effect of Deviations in Thermal Test Conditions on the Characteristics of Strength – V. N. Geminov and A. A. Kallan 502 116
Installation for Studying Fatigue Strength of Acoustically Active Materials at Ultrasonic Loading Frequencies with Exposure to Electric and Magnetic Fields – V. A. Kuz'menko, G. G. Pisarenko, and A. K. Gerikhanov 507 120
Modernized Installation for In-Reactor Study of Creep and Stress-to-Rupture Strength of Materials in Plane Stress – V. N. Kiselevskii, V. K. Lukashev, and G. P. Khristov 509 122

Volume 9, Number 5 May, 1977

SCIENTIFIC AND TECHNICAL SECTION
The Theory of Steady Plastic Deformation – M. Ya. Leonov, B. A. Rychkov, and Zh. Sulaimanov 513 3
Instability of Deformations in Brittle Fracture Mechanics Problems – S. D. Volkov and G. I. Dubrovina 518 8
Stressed and Strained State of a Cylindrical Arch in an Axisymmetrical Temperature Field – V. M. Panferov, É. A. Leonova, and O. A. Kilikovskaya 524 13
Strength of a Transversely Isotropic Plate with an Elliptical Notch in a Steady Temperature Field – B. L. Pelekh, V. A. Laz'ko, and B. N. Polevoi 528 17
Life of a Quasibrittle Body with an Internal Crack Close in Plan to Round in Cyclic Loading – V. V. Panasyuk, A. E. Andreikiv, and M. M. Stadnik 531 19
Determination of Three Strain-Tensor Components from Data on Only One Deformed Raster – V. A. Zhilkin and A. M. Popov 536 23
Failure in Molybdenum Alloy Containing 3.5 vol.% TiN – V. I. Trefilov, I. K. Pokhodnya, A. D. Vasil'ev, I. S. Malashenko, V. F. Moiseev, and É. P. Pechkovskii 541 27
Problem of Numerical Calculation of the Parameters of the Paris Equation – M. V. Baumshtein, V. V. Pokrovskii, and A. V. Prokopenko 547 33
Fatigue Resistance of Aircraft Propeller Blades – M. N. Stepnov, A. S. Seregin, O. V. Leonova, Yu. L. Sukhorosov, E. I. Kulikov, and É. V. Dunaev 550 36
Fatigue Failure of S[illegible]n Iron in Air and in Vacuum – N. M. Grinberg and E. N. Aleksenko 555 40

	Engl.	Russ.
Growth Rate of Fatigue Cracks in the Frame Side Members of the 2TÉ-116 Locomotive – M. E. Georgiev, V. N. Danilov, N. Ya. Mezhova, E. M. Morozov, and V. B. Tskipurishvili	561	46
Accumulation of Damage in Low-Cycle Fatigue in Working Media – I. P. Pistun and V. I. Tkachev	568	52
Temperature State of Hollow Cylinder Subjected to Internal One-Sided Heating – G. N. Tret'yachenko and B. S. Karpinos	572	56
Thermal Stresses and Their Influence on the Character of Fracture in the Rollers of Continuous Steel-Casting Installations – Yu. V. Denisov, M. L. Komissarova, G. V. Konstantinov, and V. M. Niskovskikh	575	59
Theory of Thin Heterogeneous Plates and Sloping Shells – V. V. Pikul'	581	65
Computing the Stresses in a Multilayer Cylinder with Consideration Given to the Characteristics of Layer Contact – P. G. Pimshtein and V. N. Zhukova	588	71
A Method of Calculating the Erosion Strength of Moist Steam Turbine Blades – R. G. Perel'man	595	78
Distribution of Mechanical Properties and Life Characteristics in Steel – L. A. Sosnovskii	605	86
Effect of Neutron Irradiation on the Plasticity Characteristics of Metals – V. D. Yaroshevich and A. N. Lapin	608	90
Nonuniformity of the Flow, Exciting Vibrations in Working Turbine Blades – A. S. Laskin, N. D. Salivon, and V. F. Kondrat'ev	612	94
PRODUCTION SECTION		
Automated Vibrating Bench for Studying Fatigue in Gas Turbine Blades with Programmed Changes in Load and Temperature – V. T. Troshchenko, A. P. Voloshchenko, B. A. Gryaznov, V. A. Rovkov, V. G. Grishko, N. A. Fot, V. I. Tseitlin, D. S. Elenevskii, R. S. Bekbulatov, E. G. Konoplyannikov, A. D. Onishchenko, and Yu. N. Fedorov	616	97
Stabilization and Programming of the Static Load during Fatigue Tests under an Asymmetric Loading Cycle and High Temperatures – V. P. Golub, I. I. Ishchenko, B. N. Sinaiskii, and A. D. Pogrebnyak	623	105
Automatic Experiment Control System for Studying Mechanical Properties of Materials under Complex Stress Conditions – V. N. Bilan, V. G. Grishko, B. I. Koval'chuk, and A. A. Lebedev	626	109
Apparatus for Determining the Characteristics of Oscillation Damping Based on the Resonant Trough of the Amplitude-Frequency Relationship of the Disturbing Force – V. V. Matveev, V. G. Lebedev, and B. S. Chaikovskii	630	113
Methods of Determining Stresses and Strains with Galvanic Copper Plating – Z. G. Kerimov and O. A. Mamed-Zade	633	116
BRIEF COMMUNICATIONS		
New State Standard on Determination of Impact Strength in Metals at Temperatures from −100 to −269°C – D. V. Lebedev, V. T. Alymov, N. V. Novikov, O. Ya. Znachkovskii, N. P. Andronov, and G. A. Stepanov	638	120
CHRONICLES		
All-Union Seminar on "Dimensional Finishing and Hardening of Machine Components by Surface Plastic Deformation" – V. M. Men'shakov and N. M. Savvina	640	122

Determining the Coefficient of Stress Intensity in a Sample with Side Grooves — G. S. Pisarenko, V. P. Naumenko, and G. S. Volkov 1155 5

Fatigue Resistance of 45 and 1Kh2M Steels under Conditions of Soft and Hard Loading with Long Lives — V. P. Troshchenko, L. A. Khamaza, and Yu. D. Mishchenko 1161 11

Approximating the Diagram of Limiting Amplitudes taking into Consideration the Area of Medium Compressive Stresses — A. I. Sochava 1169 18

Development of the Hypothesis of Linear Discrete Accumulation of Fatigue Damages in a Statistical Aspect — V. M. Duplyakin and A. S. Mostovoi 1173 22

Fatigue Crack Propagation under Variable-Amplitude Loading — Herbert F. Hardrath 1177 26

Thermal Fatigue Strength of Directionally Solidified, Casting Nickel Alloy ZhS6U — T. A. Gordeeva, R. A. Dul'nev, T. V. Rybina, G. I. Sobolev, V. A. Chumakov, and N. F. Shvananova 1181 30

Thermal Stress State of Cylindrical Specimens under Thermal Cycling — V. T. Troshchenko, L. A. Zaslotskaya 1188 37

Fatigue of AMg6M Sheet Material with Coatings of Sprut 5M and VAK in the Linear and Plane Stressed Conditions under Conditions of High-Frequency Loading — R. I. Stefanov 1197 45

Size Effect in Tests of Commercial Devitrified Glasses in Uniaxial Compression — G. S. Pisarenko, Yu. M. Rodichev, G. M. Okhrimenko, A. P. Poleshko, and A. I. Borimskii 1199 47

Temperature Dependence of the Flexural Strength of Macro- and Microcrystals of Corundum — V. G. Govorkov, G. V. Berezhkova, and V. A. Milovanov 1206 54

Effect of Preloading of a Heated Specimen of Fiberglass-Reinforced Plastic AG-4S on its Strength Properties — Yu. A. Prozorov, V. N. Blinov, V. I. Kolesov, and Yu. V. Tserkovnyuk 1211 59

Thermal Fatigue Strength of Clad Metals — A. S. Tron', L. A. Zabashta, S. Yu. Didenko 1213 61

Failure of Titanium Alloy TS5 with a Gas-Saturated Surface Layer — V. N. Bastun and B. S. Krylov 1215 64

Creep of Cyclically Loaded Structural Elements — O. V. Sosnin, B. V. Gorev, and V. V. Rubanov 1217 66

Fatigue Strength of Austenitic Steels in Liquid Nitrogen — G. A. Stepanov, V. N. Morozov, and É. A. Kivi 1221 70

	Engl./Russ.	
Effect of Sharp Notches and Cracks on the Transition to Quasibrittle Fracture of Structural Metals Ductile at Cryogenic Temperatures – N. V. Novikov and O. Ya. Znachkovskii	1226	74
Low-Temperature Aging of Beryllium – V. G. Tkachenko, Yu. P. Alifanov, and V. G. Yushko	1231	78
Selecting the Specimen and Dynamometer for High-Speed Tension Tests – A. P. Vashchenko and G. V. Stepanov	1237	84
Energy Dissipation in Laminar Elastic Rods Subject to Longitudinal Oscillations – A. P. Yakovlev	1242	89
Effect of Strengthening and Embrittlement on the Dissipation of Energy in the Deformation-Aging of Casing Steels for Atomic Power Plants – A. A. Astaf'ev, V. N. Zenin, S. I. Markov, B. S. Chaikovskii, and V. A. Yukhanov	1248	94
Effect of Long Service on the Fine Structure of the Surface Layers of Gas Turbine Engine Rotor Blades – O. I. Marusii, Yu. I. Koval', E. N. Kaspruk, and V. N. Torgov	1257	103
Plasticity of Metals – T. A. Kontorova	1261	107
Effect of a Plasma Coating on the Fatigue of 40 and 1Kh18N10T Steels – É. S. Umanskii, N. I. Afonin, Yu. S. Borisov, and A. M. Vyal'tsev	1267	112
A Method of Determining the Fatigue Limit in Tests with Step-by-Step Loading – V. D. Vdovin and V. M. Grebenik	1269	114
CHRONICLES		
The Institute of Technical (Structural) Mechanics during the Years of Its Activity from Its Creation to the Great Patriotic War (1919-1941) – S. V. Serensen.	1276	119

Volume 9, Number 11 November, 1977

SCIENTIFIC-TECHNICAL SECTION		
Calculation of Conditions for Crack Retardation in a Plate by a Transverse Compression Zone – G. S. Pisarenko, V. P. Naumenko, and V. I. Koval'	1285	3
Study of the Connection between Metal Fatigue Endurance and the Level of Cyclic Inelastic Strain – V. T. Troshchenko, Yu. I. Koval', and G. V. Tsybanev	1291	9
Some Regularities in the Variation of Heat-Resistant Nickel Alloy Fatigue Resistance under the Combined Action of Alternating and Static Loading – I. I. Ishchenko, B. N. Sinaiskii, V. P. Golub, A. D. Pogrebnyak, and E. Ya. Palienko	1296	15
Determining the Effect of Defects on Fatigue Strength of 00Kh12N3D Steel – L. I. Domozhirov and G. Z. Zaitsev	1303	22
Determination of True Notch Sensitivity – N. M. Rudnitskii	1307	25
Investigation of the Residual Fatigue Life of Material D16 ATV under Two-Step, Low-Cycle Program Loading – A. I. Radchenko and A. É. Sultanov	1312	30
Effect of Aluminum Coatings on the Fatigue of Alloy ZhS6U – M. S. Belyaev, N. D. Zhukov, M. P. Krivenko, and V. V. Terekhova	1316	34
Kinetics of Fatigue Crack Growth in Ferrosilicon in a Vacuum and in Air – N. M. Grinberg, E. N. Aleksenko, and I. L. Ostapenko	1320	39
Effect of Plastic Constraint on the Fracture Toughness of Ductile Steels – G. S. Pisarenko, V. P. Naumenko, and G. S. Volkov	1325	45
Investigation of Creep of Aluminum under Static and Cyclic Loading – I. E. Kurov and A. M. Skuridin	1333	52
Statistical Analysis and Prediction of the Heat-Resistance Characteristics of Cast Alloys for Gas Turbine Engines (GTD) – I. P. Bulygin, L. N. Timofeeva, E. R. Golubovskii, I. P. Trunin, R. N. Sizova, and I. N. Boromolova	1337	57

Change in the Creep Characteristics of AK4-1 Alloy as a Result of Preliminary Thermal–Ultrasonic Treatment – G. Ya. Bazelyuk, V. I. Kovpak, S. Ya. Matsnevskaya, and I. G. Polotskii 1343 63
Determining the Characteristics of the Creep of Metals on the Basis of the Formal Activation Theory – A. A. Yudin. 1347 67
Accumulation of Plastic Deformation under Conditions of Limited Creep in the Nonuniform Stress State – L. A. Zaslotskaya and V. V. Osasyuk 1350 71
Creep and Life of Armco Iron with a Molybdenum Plasma Coating – V. I. Kopylov and V. F. Shatinskii 1355 75
Lacombe-Equation Processing of Primary Creep Curves – Yu. V. Kashirskii, A. A. Yudin, and V. V. Zharov 1359 79
Controlling Cracks by Stress Waves – V. E. Sereda and V. M. Finkel' 1363 83
Assessing the Fracture Toughness of Structural Steels by the Critical Crack Opening Method – D. V. Lebedev, L. V. Popova, and V. N. Zikeev 1369 89
Energy Dissipation in Elastic Laminated Rods Subject to Torsional and Bending Oscillations – A. P. Yakovlev 1372 92
Method for Determining the Failure Load for Metal Samples from the Acoustic Emission Characteristics – N. V. Novikov and V. E. Vainberg. 1380 99
Influence of Temperature and Oxidation Method on the Mechanical Properties of Heat-Resistant Titanium Alloys – Yu. K. Zaikin, N. I. Shirokova, and V. V. Kryukovskii. 1383 103

PRODUCTION SECTION

Machine for Fatigue Tests of Materials at Cryogenic Temperatures – V. K. Samarin and N. V. Novikov. 1386 105
Automatic System for Investigating the Strength of Turbomachine Rotors in Cyclic Loading – I. A. Kozlov, S. A. Polyakov, and V. L. Akhremenko 1390 110
Methods of Decreasing the Error in Resistance Strain Gauges in Radiation Heating – G. A. Tsareva. 1393 113

CHRONICLES

Theses on Problems of the Strength of Materials and Design Elements Defended in the Institute of Strength Problems of the Academy of Sciences of the Ukrainian SSR in 1976 – R. I. Kuriat and R. R. Kocherovets 1397 117

Volume 9, Number 12 December, 1977

SCIENTIFIC – TECHNICAL SECTION

A Method of Assessing the Plane-Strain Fracture Toughness of Plastic Materials – G. S. Pisarenko, V. P. Naumenko, and G. S. Volkov. 1405 3
Longitudinal Shear of an Anisotropic Body with Crack-Type Defects – L. T. Berezhnitskii and V. M. Sadivskii. 1410 8
Crack-Edge Friction and Statistical Determination of the Strength of a Flawed Plate in Alternating Tension – Compression – P. M. Vitvitskii and S. Yu. Popina. 1416 14
The Ability of Titanium Alloys to Stabilize Failure under Cyclic Load – B. A. Drozdovskii and L. V. Prokhodtseva 1420 18
Interaction between Fast Crack and Two-Media Interface – V. E. Sereda and V. M. Finkel'. 1426 24
Patterns of Deformation and Fracture in Steel R6M5 in a Complex Stress State – V. P. Lamashevskii, A. A. Lebedev, V. A. Ostaf'ev, V. N. Rudenko, R. E. Narinskii, and V. S. Belinskii 1430 28
The Reciprocal Problem of Mechanics. The Identification and Diagnostics of Mechanical Systems – K. K. Glukharev and K. V. Frolov. 1434 32
Thermal Elasticity of a Hollow Sphere with Temperature-Dependent Thermal Conductivity – I. N. Makhorkin 1441 39

	Engl./Russ.	
Choice of Optimum Design for an Internal Combustion Engine Piston — A. L. Kvitka, P. P. Voroshko, and V. I. Kravchenko	1443	41
Response of a Flexible Elastoplastic Membrane to Transverse Impact by a Cone — Sh. M. Mutallimov	1445	44
Quantitative Estimation of the Resistance of Metals to Cyclic Creep — V. A. Strizhalo.	1451	49
Influence of the Surface State of Chromium — Nickel Steel Specimens on Their Mechanical Properties at Low Temperatures — N. V. Novikov, N. I. Gorodyskii, and A. P. Ul'yanenko	1454	52
Method of Calculating the Ultimate Strength of Porous Mesh Materials — A. F. Tret'yakov, Yu. I. Sinel'nikov, A. G. Kolesnikov, and G. P. Polushkin	1457	55
Kinetics of Fracture of Nodular Cast Iron by the Method of High-Speed Photography — I. S. Guz', A. P. Lyubchenko, V. M. Matsevityi, S. L. Molodtsov, and L. A. Smirnova	1462	60
Physical Nature of Acoustic Emission in the Deformation of Metallic Materials — N. V. Novikov and V. E. Vainberg	1467	65
Electron Microscope Study of the Dislocation Structure of Molybdenum Single Crystals in Fatigue — E. É. Zasimchuk, S. A. Firstov, N. D. Bega, and A. B. Medovar	1471	70
Effect of γ Radiation on the Dynamic Strength of Piezoelectric Elements of Materials TsTBS-3 and TsTSNV-1 — V. V. Kochetygov, G. G. Pisarenko, V. S. Kholopov, and E. D. Fedchenko	1474	73
Investigation of the Anisotropy of Structural Graphites with Regard to Physicomechanical Properties and Parameters of Ultrasonic Nondestructive Testing — V. D. Liventsev, G. A. Lushnikov, and Yu. P. Anufriev	1477	76
Dissipation of Energy in Vibrations of Metallic Specimens with Plastic Coatings — A. P. Yakovlev	1481	80
Study of the Damping Capacity of a Turbine Blade Fir-Tree Fixing with a Composite Root — V. V. Matveev, B. S. Chaikovskii, and D. E. Shpak	1485	84
An Analysis of the Stressed State in the Neck Area of Tubular Samples under Tension — M. P. Markovets, E. S. Kostov, and I. M. Iordanov	1490	89
Distribution of Mechanical Properties and the Relationship between Them — D. M. Belen'kii, A. I. Él'kin, and A. V. Rusakov	1494	93
PRODUCTION SECTION		
A Method of Thermal Calculation of High-Temperature Units for Material Mechanical Testing Equipment — V. K. Kharchenko, A. I. Petrenko, and M. M. Aleksyuk	1499	97
Experimental Investigation of the Damping Properties of Composite Coatings — A. P. Yakovlev	1504	102
Elastic Constants of Pyrolytic Graphite — G. G. Zaitsev and V. N. Barabanov	1510	108
CHRONICLES		
New Aspects of the Problem of Dissipation of Energy in Vibrations. The Eleventh Conference on Questions of the Dissipation of Energy in the Vibrations of Mechanical Systems — V. V. Matveev and N. Ya. Nastenko	1512	110
